

The Atlanta Convention Center at AmericasMart (ACC) is closed to the public in compliance of the Mayor's directive through April 7.

Event cancelations and postponements are determined individually by each event's organizer. Please contact event organizers directly for status.

While we continue hosting events and booking new business, the health and safety of our clients, visitors and staff are the number one priority at ACC. We are actively and continuously monitoring the Covid-19 Coronavirus outbreak, informed by local and national authorities, public health advice, CDC and WHO guidelines, for the benefit of all attendees at the special events and trade shows staged on our campus.

Preventative actions we have put in place include the following steps. We will remain in regular communication as any changes occur.

- Increased surface cleaning and use of disinfectants (door handles, elevator buttons, escalator handrails, registration desks, restrooms, food service areas, coat check, etc.).
- Increased hand sanitizing stations around the campus (main lobbies, registration areas, food service areas, elevator and escalator landings, etc.)

We encourage all event organizers, exhibitors and attendees to refer to the guidelines and protocols as suggested by the CDC (<https://www.cdc.gov/coronavirus/2019-ncov/about/prevention-treatment.html>), WHO (www.who.int) and local /national public health authorities to contain and mitigate any further spread of the virus. Sharable resources are below.

We will continue to closely monitor this situation and update our customers accordingly.

Thank you for your business.

RESOURCES

From the [Centers for Disease Control and Prevention](https://www.cdc.gov) (CDC):

For the general American public, who are unlikely to be exposed to this virus at this time, the immediate health risk from COVID-19 is considered low.

Under current circumstances, certain people will have an increased risk of infection, for example healthcare workers caring for patients with COVID-19 and other close contacts of persons with COVID-19. CDC has developed guidance to help in the risk assessment and management of people with potential exposures to COVID-19.

Comprehensive information from the CDC can be found at: <https://www.cdc.gov/coronavirus/2019-ncov/index.html>

From the World Health Organization (WHO):

RECOMMENDATIONS AND ADVICE FOR THE PUBLIC If you are not in an area where COVID-19 is spreading, or if you have not travelled from one of those areas or have not been in close contact with someone who has and is feeling unwell, your chances of getting it are currently low. However, it's

understandable that you may feel stressed and anxious about the situation. It's a good idea to get the facts to help you accurately determine your risks so that you can take reasonable precautions. (See Frequently Asked Questions) Your healthcare provider, your national public health authority and your employer are all potential sources of accurate information on COVID-19 and whether it is in your area. It is important to be informed of the situation where you live and take appropriate measures to protect yourself. (See Protection measures for everyone).
